DETAILED ACTION

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claims 1, 7, 13, 18 and 19:

The primary reason for the allowance of claims 1, 7, 13, 18 and 19 is the inclusion of: if the wavelet power spectrum from the acoustic scan corresponds to one or more reference wavelet power spectra, communicate analysis results indicating that the object under analysis comprises one or more particular known anomalies corresponding to the one or more reference wavelet power spectra that correspond to the wavelet power spectrum. These are the features found in the claim(s), as they are claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes these claim(s) allowable over the prior art.

Claims 2-6 are allowed due to their dependency on claim 1.

Claims 8-12 are allowed due to their dependency on claim 7.

Claims 14-17 are allowed due to their dependency on claim 13.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ahuja et al. (USPN 5,740,036) teaches a method and apparatus

for analyzing geological data using wavelet analysis, Guigne (USPN 4924449) teaches an acoustic sub-surface interrogator, Bechhoefer et al. (USPUB 2004/0230383) teaches a wire fault detection system and Yamamoto (USPN 5,243,565) teaches a method of measuring direction spectra of surface gravity waves.
